

Personal Colour Analysis Summary

The four colour attributes that harmonise with you

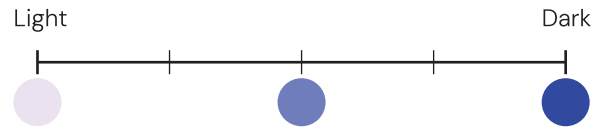

1. Hue: What is your base?

Yellow Base: Your skin is complemented by warmth, appearing healthy and radiant.

Blue Base: Your skin is complemented by cool tones, appearing bright, clear, and polished.

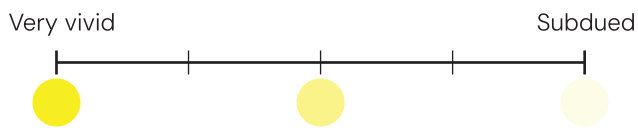

2. Value: Are you light or dark?

Light: Lighter colours make your face appear bright and luminous.

Dark: Darker colours add structure, providing a defined, slimming effect.

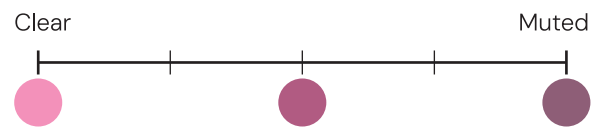

3. Saturation: Are you vivid or subdued?

Vivid: High-saturation colours make your facial features look striking and defined.

Chic: Lower-saturation colours appear elegant, soft, and gentle on your features.

4. Clarity: Are you clear or muted?

Clear: These colours look crisp and luminous. They sharpen your facial contours and make your skin glow.

Muted: These colours appear soft and refined. They provide an even, smooth texture to your complexion.
